

# Clario SmartWorklist

## The Best Worklist is the One You Don't Need to Look At

Clario SmartWorklist™ offers a functionally-rich, vendor-neutral, zero-footprint worklist that aims to achieve worklist perfection for each individual physician in your imaging group.

Designed with flexibility in mind, Clario SmartWorklist ensures the right physician is presented with the right case at the right time, regardless of the complexity or disparate nature of your environment.

With the ability to launch over 50 other applications through highly tailored and dynamic worklists, Clario SmartWorklist can adapt to the unique needs of any enterprise.

### At a Glance

- › Multiple-viewer support to integrate disparate medical image repositories
- › Auto-next reading mode physicians can trust to present the most appropriate examination, without having to return to the worklist
- › Automatic examination distribution based on real-time variables such as availability, subspecialty, workload, location and more
- › Dynamic worklist activations to automatically show and hide overflow worklists based on criteria-driven thresholds
- › AI-enabled Clario SmartWorklist can be augmented with actionable data through a vendor-neutral interface

# Redefine Your Workflow

## Key Features

### Optimize medical imaging workflow:

- › Present each physician with their shift-based worklist, sorted and organized according to the reading priorities of your practice
- › Auto-next feature eliminates time spent reading the worklist
- › Launch multiple PACS viewers, EMRs, voice recognition systems and clinical applications
- › Productivity gauge provides physicians with real-time metrics

### Integrate physicians' non-reading tasks:

- › Double-blind, ongoing, and focused peer learning
- › Preliminary reporting and discrepancy tracking
- › Teaching files, tumour board, and conferences organized in folders
- › Image quality feedback for technologists
- › Resident-attending worklists

### Track productivity and quality metrics:

- › Use real-time data to objectively implement process improvements
- › Ensure quality is maintained

### Define your practice operations:

- › Subspecialty group definition
- › Service-level agreement rules
- › Exam assignment and load-balancing rules
- › Shift-driven rules
- › Alerts and notifications

### Connect with the key stakeholders:

- › Collaboration between physicians and physician support staff
- › Instant message with your ordering physicians and technologists
- › Capture and display ordering physician contact information

## Application Plugins

### Reporting Workflow

SmartWorklist integrates with all of the industry-standard Voice Recognition systems and can easily adapt to the reporting workflow needs of your organization

### Customer Portal

Connect your ordering physicians and technologists directly to their results and their radiologists

## Framework Plugins

### Linked Workflow

Share worklists with other workflow systems for over-read services and operations support

### AI Integration

Allows for your AI vendor to provide actionable information to your SmartWorklist

### EMR Connectivity

Connect to multiple EMRs through FHIR interfaces to get updated patient demographics and key exam information

### RIS Connectivity

Seamlessly connect to and from your RIS for relevant patient data
